

## **Experimental investigations of wind resources and siting parameters**

### **Conveners:**

Jakob Mann (DTU Wind Energy, [jmsq@dtu.dk](mailto:jmsq@dtu.dk))

José M.L.M. Palma (University of Porto, [jpalma@fe.up.pt](mailto:jpalma@fe.up.pt))

### **Description:**

Full scale atmospheric experiments are essential for the validation of model predictions of the annual energy production and other siting parameters such as extreme winds, turbulence, shear, etc. We welcome presentations concerning wind energy experiments with validation of models in mind. Some are from the New European Wind Atlas project, but presentation should not be limited to those.
